

# H1 heading

The latest references for formatting can be found on the Material website.

## H2 heading

This is a test sentence underneath an H2 heading.

### H3 heading

This is a test sentence underneath an H3 heading.

**H4 heading** This is a test sentence underneath an H4 heading.

**H5 heading** This is a test sentence underneath an H5 heading.

This is a paragraph with a link. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Fusce convallis augue eget ex auctor, at semper nulla interdum. Etiam dapibus gravida augue vel interdum. Nunc blandit tempor turpis, ut tristique orci lacinia quis. Aliquam non pulvinar diam, eu interdum magna. Praesent ut condimentum odio.

## Table

| Command                   | Keybinding       |
|---------------------------|------------------|
| Jump to Search modules    | Ctrl-L or Ctrl-F |
| Move to menu option above | Up arrow key     |
| Move to menu option below | Down arrow key   |

## Code

This is an example of `code` within a sentence.

This is an example of a Python code block, which should include a code block title:

```
py title="example.py" def bubble_sort(items):    for i in range(len(items)):
for j in range(len(items) - 1 - i):                if items[j] >
items[j + 1]:                                     items[j], items[j + 1] = items[j +
1], items[j]
```

## Lists

### Ordered list

1. This is an ordered list item.
  1. This is an ordered list item.

2. This is an ordered list item.
3. This is an ordered list item.

### Unordered list

- This is an unordered list item.
  - This is an unordered list item.

## Replacement text

We use the `extra` feature in the `mkdocs.yml` file to create replacement shortcut terms frequently used term. This is done by writing a term between two braces like this `{ { term } }` (excluding the extra spaces between the braces).

`{ { test } }` = `{{test}}`
